NEW YORK, April 21.—Extreme confusion of the speculative temperament was caused by the action of the stock market during the earlier part of the day, and the result was a declining of participation in the dealing by the professional traders and the adoption of a waiting attitude to see what the some of the most obvious movements increased the feeling of doubt and uncertainty. Alternating declines and advances kept the market in such a wavering state as is rarely witnessed. Two items of the day were of positive influence, and these were of contrary effect. Announcement of plans for a summer trip abroad by E. H. Harriman and the modified restrictions on the Erie bond issue by the New York Public Service Commission were unexpected developments. The rumors repetite by the relaxed requirement on the Erie caused the Erie stocks to respond, and there was some sympathetic effect in other portions of the list.

A special source of speculative confusion was the crack conditions bore more favorably on the grain copporations of the wither what tere of the winter wheat conditions bore more favorably on the grain crop prospects and anxiety was pore acute over the fate of the where wheat crop. The day.
